BELT CLEANERS

CARRYBACK REMOVAL SOLUTIONS FOR ALL APPLICATIONS

L3651

PROBLEM

CONSEQUENCES OF CARRYBACK

Carryback is material that sticks to the belt past the discharge point and then drops off along the conveyor's return run.

Without belt cleaners, prevalent carryback causes...

- Reduced operating efficiency and profitability through increased expenses for maintenance and cleanup and the loss of material.
- Material buildup on rolling components leading to seized idlers, wandering belts and increased power consumption.
- Lower plant morale as employees sense the "I don't care if it's dirty" attitude.
- Unsafe working conditions caused by material accumulation on floors and walkways, creating fire hazards and slip/trip hazards.
- Health hazards and environmental concerns created by airborne material.
- Unfavorable attention from neighbors and regulatory agencies.

SOLVED

CARRYBACK REMOVAL SOLUTION

Belt cleaner systems from Martin Engineering make conveyor systems cleaner, safer and more productive.

With belt cleaners, minimized carryback results in...

- Improved maintenance planning and conveyor availability as emergency outages, unscheduled downtime and “hurry-up” repairs are reduced.
- Reduced maintenance expenses by lower labor costs for fewer and faster service procedures. Improved manpower utilization by fewer belt-tracking and material-cleanup chores.
- Maximized equipment life by fewer replacements of prematurely worn components damaged by fugitive material and buildup.
- Improved working conditions and plant safety and morale by better housekeeping.
- Improved community relations and regulatory compliance by reducing environmental pollution.

PRIMARY CLEANERS

MARTIN® PRIMARY CLEANERS

As the first stage in a multiple cleaner system, the primary cleaner removes the majority of material adhered to the belt, leaving only a thin layer of sticky fines.

Primary cleaners are generally tensioned at low pressure—roughly 2 psi (13.8 kPa)—against the belt. Low blade-to-belt pressure allows the primary cleaner to be positioned at a peeling angle against the belt. The use of higher pressure at this angle would endanger the belt, splice or cleaner itself.

Primary cleaners are typically installed on the face of the head pulley, just below the material trajectory. The cleaner should be constructed to avoid material buildup and installed so that it is out of the material stream.

SELECTION GUIDE

Required Data

Belt width
Head pulley diameter
Belt speed
Material characteristics
Application temperature

Selection Process

1. Identify the specifications for your conveyor.
2. Use your conveyor's specifications for **belt width** and **pulley diameter** to select a primary cleaner in the Primary Cleaner Sizing Chart on the opposite page.
3. Check your selection against the recommended **maximum belt speeds** in the Primary Cleaner Scale Chart on the opposite page.
4. Use **material characteristics** and **application temperature** to identify the appropriate urethane blade in the chart on page 6.

PRIMARY CLEANER SIZING CHART

Belt Width in. (mm)	Head Pulley Diameter—in. (mm)						
	7-10 (180-250)	12-16 (300-400)	18-22 (450-560)	24-30 (600-760)	32-38 (810-970)	40-46 (1010-1170)	48+ (1220+)
12 (300-400)	1	2	N/A	N/A	N/A	N/A	N/A
18 (400-500)	1	2	3, 4 or 5	6 or 7	N/A	N/A	N/A
24 (500-650)	1	2	3, 4 or 5	6 or 7	N/A	N/A	N/A
30 (650-800)	1	2	3, 4 or 5	6 or 7	N/A	N/A	N/A
36 (800-1000)	1	2	3, 4 or 5	6 or 7	N/A	N/A	N/A
42 (1000-1200)	2	2	3, 4 or 5	6 or 7	8	N/A	N/A
48 (1200-1400)	2	2	3, 4 or 5	6 or 7	8	8	9
54 (1400-1600)	2	2	3, 4 or 5	6 or 7	8	8	9

PRIMARY CLEANER SCALE & BELT SPEEDS

Maximum Belt Speed by Categories: fpm (m/sec)

Blade Dimensions given in inches (mm)

In instances of conflict between size and speed, choose the larger size.

PATENTED CARP CLEANER BLADES

Martin belt cleaner blades come in a large array of shapes, sizes and materials to most effectively remove any type of material carryback while protecting the belt and its splices.

Martin's patented Constant-Angle/Constant-Area Radial Pressure (CARP) blade design maintains consistent cleaning through all stages of blade wear.

Martin® CARP Blades are protected by U.S. Patent No. 4,917,231.

MARTIN® HIGH-PERFORMANCE URETHANES

Martin Engineering is the worldwide leader in the development of high-performance urethanes for specialized applications. Available for any Martin primary and secondary cleaners, as well as any primary cleaner supplied by another manufacturer.

SELECTION GUIDE

Color	Application Description	Typical Materials	Temperature Range
Orange (blank or OR)	Standard Martin® Urethane is suitable for most applications, including abrasive conditions and exposure to solvents or oil.	Bauxite, coke, coal, refuse, steel/ore, etc.	-20° to 160°F (-30° to 70°C)
Brown (BR)	Chemical-Resistant Urethane provides improved resistance to chemicals and reduced water absorption in high-moisture environments.	Limestone	-40° to 160°F (-40° to 70°C)
Green (GR)	High-Temperature Urethane withstands exposure to intermittent temperatures of up to 350°F (177°C).	Clinker	-40° to 300°F (-40° to 150°C)
Tan (CL)	Low-Rigidity Urethane is ideal for dry products such as sand and gravel.	Gravel, dry sand	-20° to 160°F (-30° to 70°C)
Navy Blue (NB)	Low-Adhesion Urethane is ideal for sticky or tacky materials.	Cement, glass, wood chips	-20° to 160°F (-30° to 70°C)
Yellow (CY)	Ceramic Bead is ideal for aggressive applications	Cement, glass, wood chips	-40° to 160°F (-40° to 70°C)

MARTIN® QC™ BLADE REPLACEMENT

One-pin blade replacement makes belt cleaner blade replacement an easy, one-minute, no-tool operation performed from outside of the chute. Simply (1) remove the R-clip and (2) slide the hitch pin out of the mainframe extrusion to (3) release the blade.

1 Remove the R-clip.

2 Slide the hitch pin out.

3 Release the blade.

CLEANSRAPE® CLEANER

The CleanScape® Cleaner lasts up to four times as long as traditional belt cleaners. Safe for use on mechanical and vulcanized splices, this metal-tipped cleaner provides aggressive cleaning without compromising your belt. Requiring minimal ongoing maintenance, CleanScape® needs only one tensioner adjustment—EVER. Installed at an angle, very little space for installation is required.

Get a quote based on your specifications: www.martin-eng.com/cleanscape

SPECIFICATIONS

Cleaner Type	Pulley Diameter in. (mm)		Belt Width in. (mm)	Maximum Belt Speed fpm (m/sec)	
	Min.	Max.		Vulcanized Splice	Mechanical Splice
CSP-S	12 (300)	20 (508)	18–48 (457–1219)	1100 (6)	800 (4)
CSP-M	22 (550)	34 (864)	18–72 (457–1829)	1500 (8)	800 (4)
CSP-L	36 (900)	50 (1270)	36–96 (914–2438)	1500 (8)	800 (4)

CARBIDE BLADE SELECTION

Carbide Selection	Application Description	Typical Materials
TU01	Suitable for less abrasive materials and low belt speeds. Applicable with mechanical belt splices.	Limestone, Salt, Sugar, Coal
TU02	Suitable for moderately abrasive materials and medium belt speeds. Applicable with mechanical belt splices.	Gravel, Clinker, Sandstone
TU03	Suitable for highly abrasive materials and high belt speeds. Do not use with mechanical belt splices.	Sand, Glass, Ore
TU04	Suitable for extremely abrasive materials and highest belt speeds. Do not use with mechanical belt splices.	Quartz Sand, Glass Ash, Ore
TU05	Suitable for conditions similar to TU01 and TU02 with chemical resistance. Applicable with mechanical belt splices.	

MARTIN® COMPACT CLEANER

Fits in spaces with as little as 6.75 inches (171 mm) of clearance on pulleys as small as 7 inches (180 mm) in diameter.

Blades are available in high-performance urethane colors to match application requirements. Patented “CARP” blade design maintains cleaning performance through all stages of blade life.

To replace worn blade, slide new blade onto square tube mainframe. Supplied with internal spring tensioner.

MARTIN® PV CLEANER

One-piece blade contains approximately 20 percent more urethane than comparable pre-cleaners, extending service life.

Uses an aggressive angle of attack to the belt to increase cleaning efficiency.

Allows “one-pin, no-tool” blade replacement. Drop the sturdy blade into place on the reinforced steel mainframe and secure it with a wire lock pin.

MARTIN® QC1™ CLEANER PD

Sturdy mainframe—2.875 in (73 mm) OD Schedule 80 steel pipe stands up to rugged conditions, large pulleys and heavy material loads.

The high-volume “CARP” blade features 20 percent more urethane than competitive cleaners.

Durable and rugged spring tensioner maintains cleaning pressure, yet allows easy re-tensioning with minimal downtime.

Saves money at purchase by reducing the need for maintenance and blade replacements.

MARTIN® QC1™ CLEANER HD

One-pin blade replacement makes belt cleaner blade replacement an easy, one-minute, no-tool operation.

Patented “CARP” blade design maintains cleaning performance through all stages of belt cleaner blade life.

Optional tungsten-tipped steel blade inserts are available for QC1™ Cleaner HD. Not for use on belts with mechanical splices—vulcanized belts only.

MARTIN® QB1™ CLEANER HD

Same ease of installation as current Martin® QC1™ Cleaners, maintaining standard installation and service costs.

Utilizes Martin’s highly effective, patented “CARP” profile, ensuring the highest level of cleaning performance expected from a Martin® Belt Cleaner.

Utilizes Martin’s innovative EVO® design principles to reduce component surface exposure to material flow, minimizing material build-up and the resulting clean-up costs, production interruptions and safety concerns.

Direct retrofit to current installations; no need for new holes or cutting head chutes.

Direct retrofit to other manufacturer’s frames.

MARTIN® QC1™ CLEANER HD MAX

Unique blade profile means the blade maintains the most efficient cleaning angle across the extended wear life.

Mainframe of rugged 3/8-in. (9.5-mm) thick DOM steel tubing has steel bar backbone. Aluminum extrusion in blade base holds cleaner snugly to backbone.

Durable and rugged Martin® Spring Tensioner XHD maintains cleaning pressure.

MARTIN® QC1™ CLEANER XHD STS

Designed to allow for all service to take place safely outside of the chute, eliminating the need for confined space permit while preventing injuries and keeping workers from harm's way. The one-pin blade replacement makes service fast and easy. Patented "CARP" design maintains cleaning performance through all stages of blade life. Economical cleaner and tensioner system combines effective cleaning, durable life and low-maintenance requirements. Available with either a Martin® Spring Tensioner HD STS or a Martin® Air Tensioner HD STS to maintain proper cleaning pressure while minimizing the need for adjustment.

MARTIN® QC1™ CLEANER XHD

Engineered to preserve the cleaning edge from high belts speeds and multiple splices.

Patented "CARP" blade design maintains cleaning performance through all stages of blade life.

Mainframe of rugged 3/8-in. (9-mm) DOM steel tubing has a steel bar backbone. An aluminum extrusion in the belt cleaner blade base holds the cleaner snugly to the backbone.

MARTIN® SHD 600 & 1200 SERIES CLEANERS

Structural steel means no more bent mainframes, even with high tonnages and large lumps.

Massive urethane blades provide up to 12 inches (305 mm) of wear life.

Martin® SHD Cleaner and tensioner are designed together for effective cleaning and reduced service requirements.

Patented "CARP" blade design maintains cleaning performance through all stages of blade life.

SECONDARY CLEANERS

MARTIN® SECONDARY CLEANERS

Installed at the point where the belt is leaving the discharge pulley, secondary cleaners remove residual fines that remain on the belt past the primary cleaner. Its location is typically close enough to the material trajectory that the cleanings will return to the main material stream.

Additional tertiary cleaners can be installed to provide final cleaning. These cleaners can be the same model as the secondary cleaner, or of a different design to allow efficient cleaning and maintenance within the available space.

As these cleaners are typically installed away from the pulley, they should be placed at or near a point where the belt is against a roller. Firm support prevents the cleaning pressure from raising the belt line and reducing cleaning efficiency.

SELECTION GUIDE

1. Check your conveyor's **belt speed** against the specifications listed for the secondary cleaners in the table below.
2. If your belt features multiple mechanical splices, or a mechanical splice in poor condition, avoid using tungsten carbide blades as rapid wear or damage to both the blade and splice may result.

APPLICATION SPECIFICATIONS

Belt Cleaner	Max Belt Speed fpm (m/sec)	Handles Reversing Belts & Rollback	Available Blade Materials				
			Mild Steel	Stainless Steel	Tungsten Carbide	Urethane	SS / TC stainless steel holder with tungsten carbide inserts
DT2 Inline Cleaner	900 (3.5)	X	X	X	X	X	X
Durt Hawg® DH2 Cleaner	750 (3.8)		X	X	X	X	
SQC2S™ Cleaner	1000 (5.1)	X	X	X	X	X	X
SQC2S™ Cleaner STS	1000 (5.1)	X	X	X	X	X	X
DT2 Inline Cleaner XHD	1200 (6.1)	X			X	X	X

Please note: Stainless steel mainframes and tensioners are available for corrosive environments.

MARTIN® DT2 INLINE CLEANER

Slide-in/slide-out belt cleaner blade cartridge allows quick and easy blade service that minimizes conveyor downtime. Even when the cleaner is encrusted with material, one-half of the split frame can be removed to allow blade change.

Effective belt cleaning reduces plant cleanup chores and prolongs life of conveying equipment.

Can be installed on conveyors that roll back or run in two directions with proper blade selection.

Lean profile minimizes space requirements, allows installation in spaces as narrow as seven inches (178 mm).

MARTIN® DT2 INLINE CLEANER XHD

Reduces plant cleanup chores and prolongs the life of conveyor components.

Mandrel allows quick-and-easy belt cleaner blade replacement to increase conveyor availability.

Individual belt cleaner blade segments slide into sturdy track-forming cartridge. This cartridge slides over stainless steel mainframe into cleaning position. The split-track cartridge design allows simple belt cleaner blade removal even with material accumulation.

MARTIN® SQC2S™ CLEANER

Rugged construction withstands harsh applications like high-speed belts and high-tonnage loads. Compact design allows installation in close quarters; narrow profile resists material buildup. Blade replacement is simple: remove the pin, slide the cartridge out, service and return.

SQC2S™ Cleaner cartridge comes with different blade options to suit your application:

RUBBER BUFFER

Patented rubber buffers maintain cleaning pressure while deflecting to allow for splices to pass and for reversal of belt direction without damage.

SAF BLADES

Light “touch” of resilient three-inch wide (75 mm) urethane blades reduces risk of damage, even on belts with multiple fasteners, rips or longitudinal splices or rollback. As cleaning edge wears, the urethane blades self-adjust to maintain effective cleaning. Cartridge mounting provides easy removal of blades from mainframe. Pry out worn blades with a screwdriver and snap new blades into place.

CHEVRON BLADES

Rubber or urethane chevron blades effectively remove carryback while gently stepping over ribs, chevrons, and cleats.

SQC2S™ Blade with rubber buffers

SQC2S™ with SAF blades

SQC2S™ with chevron blades

SQC2S™ CLEANER STS

Designed for safety, this cleaner helps prevent injuries and keep workers from harm's way during service. This safe-to-service cleaner allows for all service to take place from one side of the conveyor, avoiding the need for confined space entry. Blade replacement/maintenance is quick and easy:

- Disengage tensioner
- Pull blade cartridge outside of the conveyor
- Remove quick release pin & blade cartridge
- Replace blade
- Push cartridge back into position
- Engage the tensioner

DURT HAWG® DH2 CLEANER

Blade replacement is fast and easy; just pound out worn blades and pound in the new ones.

Optional resilient urethane cleaning elements absorb impact and let splices pass without damage.

Rugged, one-piece molded urethane elements stand up to tough conditions.

MARTIN® H2O CLEANER

Martin® H2O Cleaner squeegees the belt to remove dirt and moisture. Suited for medium-duty applications, on 18- to 96-inch (450- to 2400- mm) belts operating at speeds up to 750 fpm (3.8 m/sec).

Comes with the option of a spray nozzle to apply water to the belt to further improve cleaning efficiency. Tensioners also available.

SPECIALTY CLEANERS

MARTIN® FOOD GRADE CLEANER

Mounts on the face of the head pulley to reclaim material into the product stream.

Engineered to fit the conveyor specifications and belt cleaning requirements of the food processing and packaging industries.

Modular belt cleaner blades on stainless steel mainframes. Supplied with internal spring tensioner.

MARTIN® BRUSH CLEANER

One or two-horsepower motor (depending on belt width) turns brush against belt motion.

Spiral Brush Cleaner uses 0.38 inch (0.96 mm) polypropylene bristles wrapped in a spiral around the hub.

Strip Brush Cleaner uses 12 brush strips that sheds even moist material that would plug other brushes. Strips are made with 0.40 inch (1 mm) polypropylene bristles.

MARTIN® HIGH TEMPERATURE CLEANER

All-steel construction allows the Martin® High Temperature Cleaner to withstand high temperatures up to 600°F.

Overlapping stainless steel or tungsten carbide blades on coil spring arms provide effective cleaning.

MARTIN® CHEVRON CLEANER

Incorporates arms with blades offset at a 30° angle to allow the edge to ripple over belt cleats.

Use the Chevron Cleaner where stringy material like vines, wire or bark can catch on conventional cleaner arms.

Suited for V-pattern or U-pattern chevrons.

MARTIN® WASHBOX™ CLEANING SYSTEM

Consists of a powder-coated steel enclosure equipped with 3 rollers, 4 spray bars, 4 inspection doors and 2 secondary cleaners.

Rather than “blast” material from the belt, the water softens the carryback.

The installation of a primary cleaner on the face of the head pulley is recommended.

A modular unit is shown with a standard box with two cleaners and a single cleaner box.

TENSIONERS

MARTIN® TWIST™ TENSIONER

The Martin® Twist™ Tensioner can be used on either primary cleaners or secondary cleaners.

Rubber element maintains cleaning pressure with minimal belt cleaner re-tensioning required.

Tensioner allows mechanical splices to pass without damage.

If blades pull through, the tensioner's coupling rolls over, releasing pressure and reducing the risk of harm to personnel or equipment.

Light aluminum housing and the fully enclosed design keeps the tensioner mechanism clean.

Martin® Twist™ Tensioner

Martin® Spring Tensioner

Martin® Air Tensioner

MARTIN® SPRING & AIR TENSIONERS

Air Tensioners use the resilience of an air spring to cushion impact.

Spring Tensioners maintain efficient belt cleaning with a rugged coil spring.

Several mounting options available.

MARTIN® SPRING TENSIONER XHD

Provides effective cleaning pressure, yet cushions splice shock to prevent damage.

Provides effective tension for heavy-duty belt cleaners and stands up to tough conditions.

Martin® Spring Tensioner XHD

MARTIN® INSPECTION DOOR

Latch handle folds down, so door stands only 2.25 inches (57 mm) high. With handle standing, door is 4.1 inches (104 mm) high.

Suitable for service temperatures up to 400° F (204° C) continuous or 450° F (232° C) intermittent.

Also available with integral guard screen.

ACCESSORIES

MARTIN® ROLL GEN™ SYSTEM

Self-contained, mini 24-Volt DC power station that generates enough power to run a wide variety of electronic systems:

- Compressor for Air Tensioner
- Activation of Water Supply to Wash Box Belt Cleaning System
- Initiation of Spray Bars
- Firing of an Air Cannon
- LED Lighting
- Reversing Tracker Switching Mechanism
- Many Other Applications...

Martin® Roll Gen™ System* consists of:

- **Martin® Roll Generator (3-year warranty)**

coupled with either:

- **Martin® Roll Gen™ Power Supply**
- **Martin® Roll Gen™ Continuous Power Supply**

* Mounted on Trac-Mount™ Idler Frame.
Depending on your existing setup,
this may need to be included.

MARTIN® CARRYBACK CAPTURE SYSTEM

Allows for the addition of secondary and tertiary cleaners outside the head chute and returns removed carryback to the cargo stream.

Reduce worker risks and cleanup costs by moving carryback away from moving parts and confined spaces.

Modular construction increases portability and makes installation easy in any unique or confined spaces; system requires only 13 inches of clearance for easy installation in tight spaces.

Minimal moving parts increase reliability and minimize opportunities for breakdowns.

MARTIN® VIBRATING DRIBBLE CHUTE

Keep material accumulations from clogging chute and burying cleaners. Low-friction plastic lining promotes material flow without accumulation.

Rubber-lined bracket transfers vibration to liner without metal fatigue. Electric vibrator provides durable performance.

REPLACEMENT BLADES

Martin offers replacement blades for all Martin® belt cleaning systems as well as systems from any manufacturer. Containing 20% more urethane in the wearable area than competitive blades, Martin® blades clean better and last longer.

Features and Benefits

- Effectively eliminate material carryback
- Reduce lost material
- Decrease maintenance hours and expenses
- Fewer blade changes means less downtime
- Best price per performance of ANY blade on the market
- All Martin® Primary Blades utilize our patented CARP (Constant Angle Radial Pressure) profile, ensuring consistent cleaning across all stages of blade wear and life.

Far-Side Tension Adjuster	38664-DXX
HD Hanger Mount Assembly	34233-HD

MARTIN® H2O CLEANER

Assembly P/N	H2O4000S
Technical Data Sheet P/N	L3831
Blade P/N	H2O4001
Maximum Belt Speed	—
Belt Width	18-84 in.

DURT HAWG® DH2 CLEANER

Assembly P/N	37144
Long Arm Blade P/N	29033-L
Short Arm Blade P/N	29033-S
Tungsten Carbide Blade P/N	34574
Stainless Steel Blade P/N	30340
Mild Steel Blade P/N	30339
Snap-On Urethane Blade P/N	32364
Stainless Steel T Blade P/N	35380-01
Technical Data Sheet P/N	3741
Maximum Belt Speed	750 fpm
Belt Width	18-96 in.

TENSIONERS

MARTIN® TWIST™ TENSIONER

Single Tensioner P/N	38850-0X
Dual Tensioner P/N	38850-2X
Technical Data Sheet P/N	L3839

MARTIN® REVERSING MOUNT SPRING TENSIONER

Reversing Mount Tensioner P/N	33599
Reversing Cleaner Z Bracket P/N	31158-01
Reversing Hanger Mount Assembly P/N	33288
Belt Width	18-96 in.
Technical Data Sheet P/N	L3370-16

MARTIN® SHOCK MOUNT AIR PADDLE TENSIONER

Tensioner P/N	32745
Belt Width	18-54 in.
Dual Tensioner P/N	32745-2R
Belt Width	60-96 in.
Technical Data Sheet P/N	L3370-16

MARTIN® SPRING TENSIONER

Tensioner P/N	38180
Belt Width	18-48 in.
Dual Tensioner P/N	38180-2
Belt Width	54-96 in.
Technical Data Sheet P/N	L3370-16

MARTIN® MOUNTING BRACKETS

L Bracket P/N	33706
Flange Mount Bracket P/N	30537
Hanger Mount Assembly P/N	27382
Reversing Hanger Mount Assembly P/N	33288
Heavy Duty Hanger Mount Assembly P/N	34233-HD
Technical Data Sheet P/N	L3370-16

MARTIN® ADJUSTABLE L BRACKET SPRING TENSIONER

Tensioner P/N	31291-SM
Belt Width	18-54 in.
Technical Data Sheet P/N	L3370-16

ACCESSORIES

MARTIN® INSPECTION DOORS

Steel Door P/N	CYA-XXXX
Rubber Door P/N	CYAR-XXXX
Extended-Height Steel Door P/N	CYAE-XXXX
Round Steel Door P/N	CYARD-XXXX
Technical Data Sheet P/N	L3432

MARTIN® CARRYBACK CAPTURE SYSTEM

Carryback Capture System P/N	CCSXXXXXXX
Belt Width	24-72 in.
Technical Data Sheet P/N	L3806

MARTIN® PRESSURE ROLLER BRACKET

Brackets Pair w/Roller for DH2 P/N	32290-XXXX
Brackets Pair w/o Roller P/N	32290-XX
Bracket Assembly for SAF2™ & SQC2S™ P/N	34542-XX
Bracket Assembly for O2, H2O & DT2 P/N	37954-XXXX
Technical Data Sheet P/N	L3370-15

MARTIN® VIBRATING DRIBBLE CHUTE

Vibrating Dribble Chute P/N	31546
w/Overload Protection P/N	31546-OL
Dribble Sheet Liner P/N	31494XXXXXX
Technical Data Sheet P/N	L3370-14

MARTIN® ROLL GEN™ SYSTEM

Roll Generator	RG1-010-XXPX
Roll Gen™ Power Supply	39413
Roll Gen™ Continuous Power Supply	contact for specs
